

elewit

Una empresa de Redeia

redeia

Global operator of essential infrastructures.

A driver of the energy transition and universal connectivity.

It operates the Spanish electricity system and manages electricity and telecommunications networks (fibre optics), with a focus on innovation and sustainability.

red eléctrica

Backbone of the energy transition, ensuring a secure, high-quality, and increasingly renewable electricity supply.

reintel

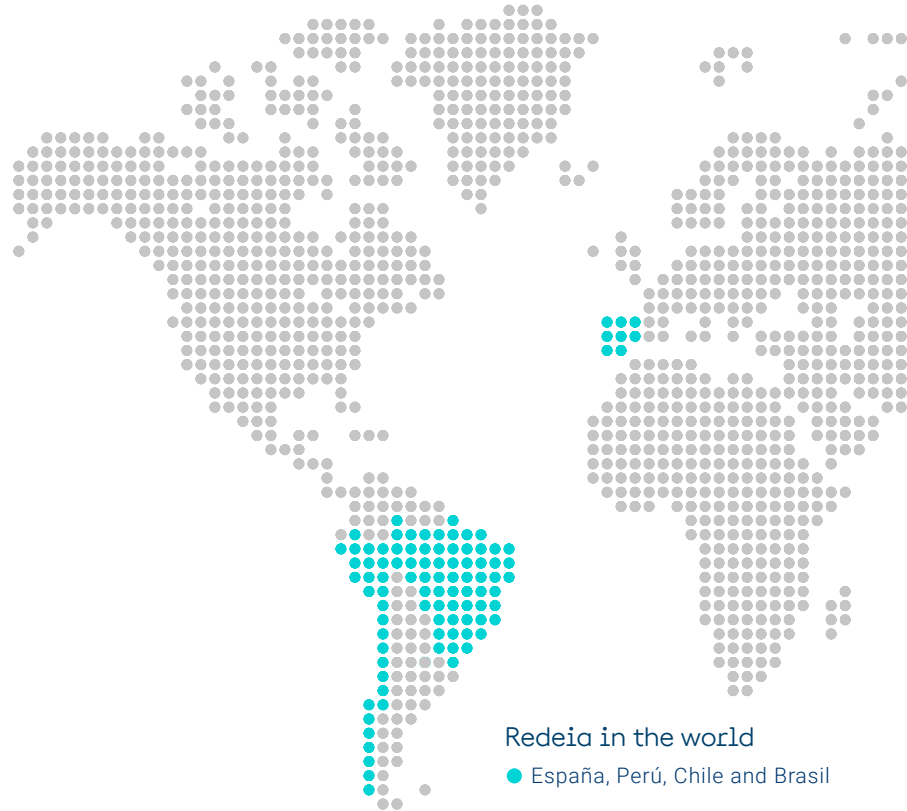

Spain's leading dark fibre provider, essential for universal connectivity.

redinter

The driving force behind the decarbonisation of the energy model and sustainable development in Latin America.

elewit

A technology innovation platform driving the energy transition and connectivity.

We are Redeia's technology platform

We were founded in 2019 with the aim of providing solutions to the new challenges facing the electricity and telecommunications sectors.

Our objective: to drive the energy transition and connectivity, and create a sustainable future.

Elewit in figures (2019-2025)

Innovation initiatives

355 initiatives

Innovation projects

184 projects and

66 technological solutions
adopted internally at Redeia

Corporate Venture Capital

Investment in 10 start-ups +
3 funds + 2 new ventures

Total invested in innovation

EUR 96 million

Our capabilities and tools

We act as catalysts for internal innovation at Redeia and harness external talent and the potential of disruptive technologies to develop innovative solutions in the fields of electricity and connectivity.

Innovation ecosystem

Networking with other corporations, companies, institutions and stakeholders in the innovation ecosystem.

Corporate Venture Capital

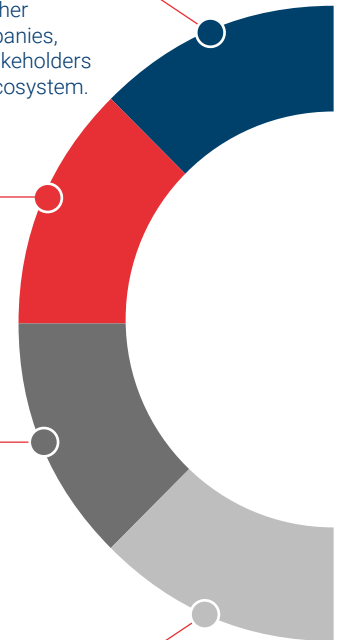

A model based on investing in companies that are certain to fit in strategically and are keenly focused on innovation.

New ventures

Innovative new business approaches.

Innovation LAB

Promoting technological innovation projects and showcasing new products and services.

Our areas of focus

Electricity transmission activity

Agility in the production chain.

Remote monitoring and Predictive maintenance.

Availability of the Transmission Network.

More sustainable operations and designs: safety and socio-environmental acceptance.

Progress on implementing the Transport Strategy.

Operational technology cybersecurity.

Beyond 2030.

Our areas of focus

Power grid operator activities

More autonomous and secure operation of the power grid.

Forecasts in the new energy context.

Observability and monitoring of the power grid.

Services for the power grid.

Designing the power grid for the energy transition.

Energy storage and integration of renewable energy sources.

Operational efficiency of the grid operator.

The value of data.

Our ecosystem

We turn ideas into products. We turn challenges into solutions.

We promote the development of innovative projects by working with universities, research centres, start-ups, companies and other organisations.

Our ecosystem:

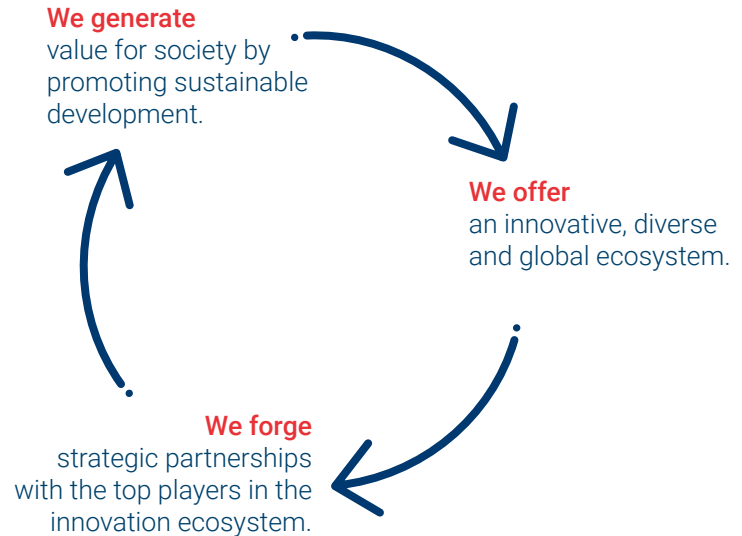

+165 partners and associates.

6 editions of the
Venture Client

10 investee companies
+ 3 funds

6 editions of the
Intrapreneurship programme

2 new ventures established
